Sequence 23, Application US/10849072
Publication No. US20040214221A1
GENERAL INFORMATION:
APPLICANT: Roche Diagnostics GmbH
TITLE OF INVENTION: High density labeling of DNA with modified or
TITLE OF INVENTION: "chromophore" carrying nucleotides and DNA polymerases
TITLE OF INVENTION: used
FILE REFERENCE: 4780/00/MO
CURRENT APPLICATION NUMBER: US/10/849,072
CURRENT PILING DATE: 2004-05-19
NUMBER OF SEQ ID NOS: 26

TITLE OF INVENTION: same, solid phases for detection of the same and preparation meth
FILE REFERENCE: 400327
CURRENT PRELIGATION NUMBER: US/09/380,728A
CURRENT FILING DATE: 1999-09-08
NUMBER OF SEQ ID NOS: 19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ; NAME/KEY: misc_feature
; OTHER INFORMATION: a synthetic probe nucleic acid, 5'-terminus:Phosphorylated,
; OTHER INFORMATION: 3'-terminus:Biotin

Sequence 100, Application US/10255023

Publication No. US20030175950A1

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: McSwiggen, James

TITLE OF INVENTION: RNA Interference Mediated Inhibition of HIV Gene Expression Using

TITLE OF INVENTION: Interfering RNA

FILE REFERENCE: 400/054 (MRH801-665-B)

CURRENT APPLICATION NUMBER: US 10/225,023

CURRENT FILING DATE: 2002-07-23

PRIOR FILING DATE: 2002-07-23

PRIOR FILING DATE: 2002-05-29

WINDER OF SEQ ID NOS: 1494

Sequence 166, Application US/10892922
Sequence 166, Application Vo. US20050124569A1
SENERAL INFORMATION:
APPLICANT: Sirna Therapeutics, Inc.
APPLICANT: Guerciolini, Robert
APPLICANT: McSwiggen, James
TITLE OF INVENTION: Was Interference Mediated Inhibition of CXCR4 Gene Expression
TITLE OF INVENTION: Using Short Interfering Nucleic Acid (siNA)
FILE REFERENCE: 400-198
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 APPLICANT: Sirns Therapeutics, Inc.
